SUMMARY

Data Analyst with strong foundations in Python, SQL, and data visualization. Experienced in building dashboards, performing exploratory data analysis (EDA), and deriving actionable insights from real-world datasets.

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Visualization:** Tableau, Power BI
- **Tools:** Excel, Google Sheets, Git, Linux
- **Other:** Data Cleaning, EDA, Statistics

EDUCATION

B.Tech (Data Science)CGPA: 9.667

Newton School of Technology, Rishihood University (2024 – 2028)

INTERNSHIP EXPERIENCE

Full Stack Developer Intern – SwyftinJune – July 2025

- Reduced UI load time by 25% and bugs by 40%
- Reduced code duplication from 30% to 5% using SonarQube
- Built WhatsApp automation system handling 500+ daily chats
- Designed scalable backend with Redis Streams and WebSockets (99.9% uptime)

PROJECTS

Netflix Data Analysis [GitHub ↗](#)

Tools: Python, Matplotlib, Seaborn, Pandas

- Analyzed Netflix dataset to uncover content trends
- Performed data cleaning and visualization using Python
- Derived insights on genres, release trends, and regional distribution

Swiggy Data Analysis Dashboard [GitHub ↗](#) [Tableau ↗](#)

Tools: Tableau, Excel

- Built Tableau dashboard for business insights
- Analyzed customer behavior and delivery trends
- Created executive-level visualizations for decision-making

ACHIEVEMENTS

- 300+ LeetCode problems solved
- 1200+ Codeforces rating
- Top 5 – Micromouse Competition, DTU Invictus
