

Aarush Gupta

Data Analyst & Visualization Specialist

aarushgupta707.2@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science & AI undergraduate with hands-on experience in data analysis, visualization, and deriving actionable business insights from complex datasets. Skilled in Python (Pandas, NumPy, Matplotlib, Seaborn), Google Sheets, and Excel. Contributed to end-to-end analytical workflows covering data cleaning, feature engineering, EDA, KPI development, and interactive dashboard design. Adept at translating raw data into clear, decision-ready insights for real-world business problems.

EDUCATION

Bachelor of Technology (Artificial Intelligence) | 2024 – 2028

Newton School of Technology, Rishihood University

Intermediate (Class XII) | 2022 – 2023

JCB School

Matriculation (Class X) | 2020 – 2021

Bishop Cotton School, Shimla

TECHNICAL SKILLS

Languages: Python, SQL

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Tools: Excel, Google Sheets

Visualization: Tableau, Recharts

Core Competencies: Data Cleaning, EDA, KPI Development, Feature Engineering, Dashboard Design, Pivot Tables

PROJECTS

Internship Opportunities in India — Data Analysis | Feb 2026

Google Sheets, EDA | [GitHub](#)

- Conducted end-to-end analysis of 8,482 internship postings (2025–26 cycle) sourced from Kaggle, addressing the fragmented internship landscape in India by transforming raw listings into actionable career intelligence.
- Engineered custom metrics including Skill Density, Perk Density, and Stipend-to-Skill Ratio to power a structured internship persona segmentation model — identifying Tech-Elite, Creative-Remote, and High-Reward Sales archetypes.
- Identified 7+ skills as the threshold for high-paying internships (₹25K+); established that Bangalore leads in both opportunity volume and stipend averages, with tech and sales roles reaching up to ₹1.5L/month.
- Built a KPI framework covering stipend distribution (₹7K–₹15K median range), city-wise opportunity share, skill frequency analysis, and English proficiency as a key requirement in premium roles.
- Designed an interactive Google Sheets dashboard with dynamic slicers, COUNTIFS/AVERAGEIFS-powered pivot tables, and conditional formatting for real-time student career planning and internship targeting.
- Delivered strategic recommendations including building clusters of 5–8 complementary skills, targeting startup hubs like Bangalore and Chennai, and prioritising internships offering LOR, certificates, and flexibility.

Swiggy Restaurant Analysis Dashboard | Apr 2026

Python, Tableau | [GitHub](#)

- Collaborated (team of 5) on end-to-end analysis of Swiggy restaurant listings across 6 Indian metro cities to identify cuisine performance gaps and market expansion opportunities.

- Performed EDA in Python (Pandas, Matplotlib, Seaborn) to explore cuisine popularity, price-band distribution, and rating trends by city, building a clean data pipeline from raw listings.
- Contributed to KPI-driven Tableau dashboards covering cuisine rating analysis, city demand benchmarking, and price-band performance to support data-backed investment decisions.
- Derived insights on high-demand but underserved cuisine segments across metro markets to guide strategic restaurant expansion recommendations for stakeholders.
